Congress refuses to adopt simplified spelling. It always has rejected any method of making the Congressional Record easier to read.

A thief in Chicago attempted to rob a girl of her pocket book and she prevented his getting away by stepping on his hand. It would be hard to understand this crushing expedient if the girl had not lived in Chicago.

The Standard Oil Office in Buffalo were entered by burglars the other day. The amount lost by the burglars has not been divulged.

President Roosevelt believes that there should be a shooting gallery in every school. If they are ever established the number of "didn't know-it-was-loaded" tragedies will be vastly increased.

Someone has suggested a plan to pay Congressmen according to the amount of work they do. If this were put into effect there would be a gratifying surplus from the Congressional salaries that would go back to the Treasury each year.

The Noble Peace prize of forty thousand dollars has been awarded the President in recognition of his service in bringing about peace between Japan and Russia. He has stated that he will donate the entire amount to the work of bringing about peace between

the interests of labor and capital in this country. It is to be hoped that the effort will not bring on war between those powerful and antagonistic forces.

A Kansas City physician has discovered that high collars worn by women produce cancer of the throat, and the Hopkins Journal adds that low-necked dresses produce pneumonia, corsets produce heart disease and shortness of breath, long skirts gather up germs of all infectious disease, thin soles produce consumption, and tight shoes cause the toes to grow together, and looking at bright millinery causes sore eyes. Women should be careful about these things.

There are twenty four farmers in the present Congress, out of a total membership of 476. The two farmers in the Senate are both from South Carolina. There are two farmers in the House from South Carolina. New York has two farmers in the House—Mr. Cocks of Suffolk, and Mr. Wadsworth of Genesee. The rest of the farmer members are scattered around the country, no two being from the same state. Will somebody please explain why it is that the farmers of the United States, with the votes to elect members of Congress in proportion to their numbers—that is nearly one-half—permit lawyers, manufacturers and bankers to so rule the roost, as is indicated by the above figure!
